all projects are done by me or under my art-direction

Finconsult

Finconsult is a group of services that helps businesses take control of their finances.

I took part in creating product strategy and helping the founder figure out the market fit and launch strategy. After that, I led my team in creating a visual identity for the product.

As with other projects, I was a handson designer here as well, creating motion design for the videos, designing the interfaces, supervising the product development, and product strategy.

I also created a visual identity for this company and supervised ads and PR.

oreword FINANCIAL MODELLING

Foreword

Some may not like our approach, others may criticize it. But we are acting entrepreneurs, and we need results in the simplest and most understandable way. We have tried different models of financial management and building financial models in our own business.

Serhii Malvsh

The author of the course, an entrepreneur, has implemented more than 300 financial models for different types of business.

Mistakes are OK

During the course, we will ask you to enter financial data from different categories. If this is your first practice, then difficulties are quite expected. If you do not know the exact value, then find the value that is closest to the truth. You can always return to previously filled data and correct them.

Course results

The result of the course will be formed financial model of your business. The last of the indicators will be the indicator of own funds. In dynamics, this indicator will show how successful your business model is.

Join the our entrepreneur community

<u>Telegram</u>

Join the Telegram group for students and graduates of the course, where you can discuss your questions and analyze cases with entrepreneurs.

Facebook

After completing the course, we ask you to write a review on the Facebook page. Feedback will help you understand topics that interest you in future courses.

M Maria

To avoid chaos in business, financial accounting was invented and created.

Financial accounting is a tool for collecting, processing and displaying information in three main reports that allows you to effectively manage your business.

Collection is when all financial transactions are included in the accounting, in their category and under a certain article.

Categories are permanent components of financial accounting. We form articles according to our business model when building management rules.

Creamscan

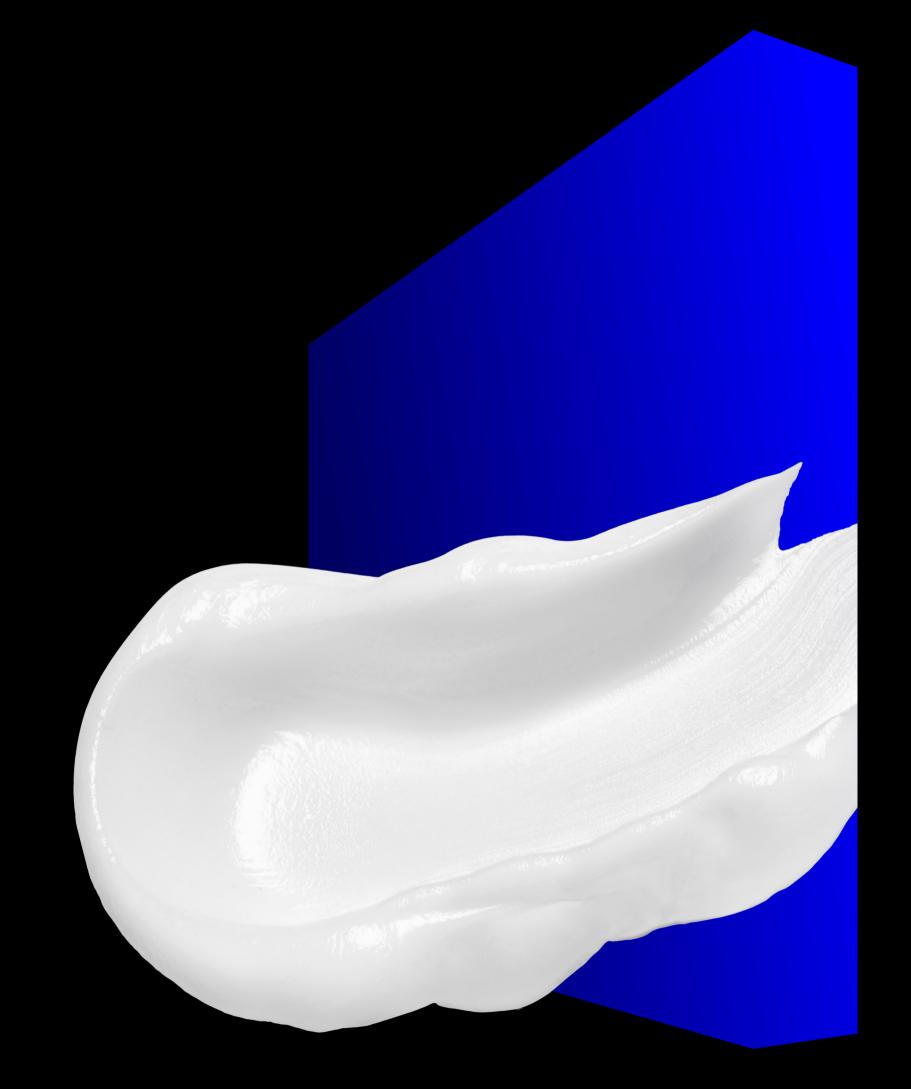

Creamscan aims to help people better understand cosmetic functions by science-based ingredients analysis. Unique algorithms and user reviews help find the best routine for any type of skin.

I was an art director and product designer, creating visual style, designing the product from the ground up in tight cooperation with the founders, developing the best user experience for the product, and overseeing a team of designers.

Foodzy

Foodzy is a grocery delivery service. We were responsible for designing visual identity, apps, and web services.

The most interesting part of this project was to create recognizable branding while maintaining simplicity and ease of use in different mediums.

I led designing client app, and full spectrum of the backend services.
